GENERAL INFORMATION

WARRANTY:

All VISE-GRIP hand tools are fully guaranteed against defects in materials and workmanship. Any tool that is abused or used for purposes other than that for which the tool was designed, is excluded from this warranty.

VISE-GRIP since 1924

When William (Bill) Petersen designed and sold his first toggle locking plier-wrench in 1924, he founded an entirely new concept in a mechanic's hand tool. Through constant research and experimentation this concept has been improved so that today the VISE-GRIP brand is known all over the world.

VISE-GRIP wrenches and clamps are manufactured in a modern factory equipped with the newest production machinery. The finest raw materials are used. Rigid inspection standards are maintained. The latest metallurgical methods are employed.

Today, VISE-GRIP hand tools are still manufactured by the same kind of folks, who, like Bill Petersen, believe in giving customers full value for every dollar.

Look for the brand name VISE-GRIP...it is stamped into every tool...the tool with a bolt in its right leg.
